

Students in Energy

Connecting Students with
Opportunities in Energy

Overview and How
Organizations Can
Participate

Students in Energy

Our Goal

The goal of the *Students in Energy* initiative is to connect students with all of the opportunities from the Department of Energy (DOE), their national labs, and the organizations that are associated with DOE.

What Types of Students can Participate?

Undergraduate and Graduate Students in Science, Technology, Engineering, and Math (STEM) related programs, majors, or degrees.

Types of Opportunities that can be Offered

- Internships
- Research
- Fellowships
- Co-Ops
- Entry Level Jobs
- Scholarships
- Other Student Programs

By the Numbers

To Date:

- 100+ Universities
- 20+ Minority Serving Institutions (MSIs)
- Total Reach equals 15,000 - 20,000 Students in STEM-related programs (number based on average applicable department/student organization size).

Students in Energy

How Opportunities will be Shared with Students

Opportunities Board - We have developed a jobs board, but for student opportunities. Organizations will be able to post as many opportunities as they have available that are applicable to the scope of the initiative. Specific tools and benefits to organizations available through the Opportunities Board are listed below.

Tools for Organizations Offered Through the Opportunities Board

Posting Opportunities

Employers can choose to receive applications by email or opt to redirect applicants to a certain URL to complete the application process. This makes receiving applications easy and effective.

Company Profile Page

Employers can create a branded company profile page that includes their logo, company information, website, images, videos, and all active opportunities posted. This can be a useful tool to attract more applicants.

Employer Dashboard

The Employer Dashboard provides the necessary tools to manage posted opportunities, view applications, site analytics, and manage profile settings in the dashboard.

Searching Candidates by Profiles & Resumes

Our smart keyword search system carefully scans each candidate's profile and each listing for the right keywords, enabling your employers to always find the best candidates.

Applicant Tracking

Our opportunity board simplifies the categorization of applications by hiring status. This tool surfaces candidate information, contacts applicants, and inserts notes for each application.

Resume Alerts

Employers can subscribe to resume alerts and receive daily, weekly or monthly emails with new student profiles matching their search criteria.

Students in Energy

Other Methods of Communicating and Sharing Opportunities with Students

Email Lists

Email will be our primary way of communicating with students. Based on the area of study/major, targeted emails can be sent to segments of our student network to ensure they are receiving opportunities and information that are specific to them.

Social Media

Instagram, Twitter, Facebook, and LinkedIn accounts will be frequently updated to share new opportunities and information about organizations that are participating in the program.

University Communication and Marketing Channels

We are working with the leadership at participating universities to promote current opportunities and other information through their own university channels. This includes, but is not limited to student newsletters, email blasts, and social media posts.

Added Benefit for Organizations

We are in close communication with the leadership at various departments in our network of universities. These contacts will be notifying us of events, such as career fairs and information sharing sessions that organizations can participate in. If organizations are interested, we can notify them and provide details on how to participate in these different types of events.

Students in Energy

How Your Organization can Participate:

We plan to officially launch the program in November 2021. Prior to launching, we will be sending our organization contacts a link to our opportunities board. This link will provide directions on how to create a company profile. Once the profile is complete you will receive a confirmation email which will allow you to start posting opportunities. We will be in contact around this time to discuss how your organization can utilize the other communication channels with universities and students.

If your organization would like to participate or if you have any questions:
